

## Customized In-House Training Classes And Seminars

JMB HAZMAT training courses are available at your work site. This training can be very cost effective when you have 5 or more employees who require the same type of training.

There are many benefits to in-house training at your location:

- Classes can be customized for the specific job functions of your employees;
- Classes can be designed to focus on specific products that you ship and the mode of transportation that you use;
- No employee travel expenses such as airfare, hotels, ground transportation, etc;
- Training can be accomplished on week-ends, if desired to keep down time to a minimum;
- Gets employees working together to achieve a common goal of compliance, which can improve productivity and morale.

Both, air transportation (IATA/ICAO) and highway transportation (49CFR) training requires between 1 and 3 days of instruction, depending on specific job functions and the level of training required. These classes are offered individually or in combination (multi-modal). Multi-modal classes require 3 to 5 days for training.

A standard classroom set-up is required with an overhead projector and screen.

The cost for in-house training is based on the type of training, number of days required and the number of students/participants. The rate that is quoted is all inclusive, and will include instructor fee, textbooks, all student handout materials and a current set of the applicable regulations for each student, and travel expenses for the instructor.

If you believe that in-house training would benefit your particular operation, call us today at (281) 316-3616 or send an e-mail request to [jmbhazmat@comcast.net](mailto:jmbhazmat@comcast.net) . We will promptly supply you with an all-inclusive written quote.
